FRAMER MOTION

Framer Motion

An open source React library to power production-ready animations. Design fluid animations for the web, across desktop and mobile.

A successor to **Pose** by Popmotion.

REACT GSAP

The GreenSock website header features the logo on the left and navigation links (Learning, Blog, Licensing, About, Login / Create Account) on the right. Below the header, the hero section has a green background with concentric circles. The main headline reads 'The standard for modern web animation'. Below this, a paragraph describes GSAP as a robust JavaScript toolset. To the right of the text are icons for SVG, WebGL, and React. At the bottom, there's a 'Get GSAP:' section with links to Cloudflare, npm, and a ZIP file, followed by a 'More...' link and a code snippet for the CDN link.
